CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

INTRODUCTION

NMISA is a Type 3A Public Entity established in accordance with the Measurement Unit and Measurement Standards Act, No. 18 of 2006 (the Act). NMISA is mandated by the Act to provide for the use of the international system of units (the SI) and other measurement units in South Africa, to maintain national measurement standards (NMS) and to determine and ensure the comparability of the NMS. More information can be obtained from www.nmisa.org.

1. PURPOSE

NMISA wishes to appoint a suitable engineering service provider on an HVAC specialised project; for the planning, designing and installation of three air handling units for laboratories at building 5 and 6, NMISA leased space in Pretoria, CSIR campus.

The current air handling units have aged and are unable to provide the required environmental conditions in the respective laboratories. NMISA has eventually decided that the three air handling units must be replaced.

The successful bidder must deliver the following milestones:

- **Initiation:** Appointment of a proven competent team of professionals; to carry out the project to fruition. Compulsory appointments: (1) Mechanical design engineer, registered with ECSA (2) Construction Health and Safety Officer as a specified category in terms of section 18(1) (c) of the Act No. 48 of 2000.
- **Planning:** Hold a series of meetings with the end-user(s) in order to develop the project specification in accordance with end-user(s) requirements. Develop drawings to meet the agreed and approved specification. Successful creation of a project plan, risk plan and quality plan.
- **Execution:** Install all air handling units, repair existing ducting where necessary, install new ducting for AHU 3 and all other components as per final design. Manage, monitor and control the execution of the project plan.
- **Commissioning:** Performance of project closure and review at project completion. Evidence of meeting all technical requirements specified on this document to be submitted and approved by NMISA.
An overview of resources required is as follows:

- Project Manager
- Mechanical Engineer
- Health and Safety Officer

**Environmental conditions requirements and design parameters per location:**

Design parameters

As per 2017 ASHRAE Handbook - Fundamentals (SI).
The following Tshwane area conditions must be considered:

- Annual Heating and Humidification Design Conditions
- Annual Cooling, Dehumidification, and Enthalpy Design Conditions
- Extreme Annual Design Conditions
- Monthly Climatic Design Conditions
- etc

These are attached and can be accessed at [http://ashrae-meteo.info/v2.0/?lat=-25.733&lng=28.183&place=%27%27&wmo=682620&si_ip=SI&ashrae_version=2017](http://ashrae-meteo.info/v2.0/?lat=-25.733&lng=28.183&place=%27%27&wmo=682620&si_ip=SI&ashrae_version=2017)

Noise Levels

The air conditioning and ventilation systems must be designed to maintain the background noise levels as specified below. The design target should be the first mentioned NR value. If the second NR value is exceeded, then corrective measures must be implemented.

In the instance that the specified noise level for item 1, on table 2 cannot be achieved with the existing infrastructure, the service provider must make recommendations for proposed improvement solutions with cost estimates outside the total cost of the project.

All ducting, existing and new to be tested and repaired to optimise the system efficiency:
- Air flow and leakage tests
- Duct sealing to eliminate leaky ducts and improve efficiency
- Duct insulation in unconditioned spaces to prevent heat loss and improve HVAC efficiency
- Balance ductwork system by installing transfer grills or jumper ducts to equalize supply and return air
- The sum of air quantities of all outlets will only be acceptable at a tolerance of 5% of that specified for the fans
- Testing equipment and personnel costs will be the sole responsibility of the selected bidder.

Notes:
- NMISA representative to be present during all tests and his approval will be required before the commissioning of the project. Where required by the Engineer, test instruments shall be tested for accuracy by an approved laboratory or by the manufacturer and certificates showing degree of accuracy shall be made available.
- Where ducting is missing, new ducting must be installed by the successful bidder. Provision for the cost of new ducting must be included in the project final pricing.
- Testing equipment and personnel costs will be the sole responsibility of the selected bidder. Provision for this cost must be included on the project final pricing.
- The National Building Regulations and Building Standards, Act No. 103 of 1977 as amended in 1984 and all amendments thereafter,
- The latest revision of SABS 0400: The Applications of the National Building Regulations, as amended,
- SANS Code of Practice for the Wiring of Premises 142 of 1981, as amended,
- The Machinery and Occupational Health and Safety Act No. 85 of 1993,
- All relevant certificate of compliance must be issued on completion of works.
- Any work that produces 100dBA or higher must be performed after hours.
- The Contractor shall guarantee the works against defects for a period of two (2) year from date of practical completion. The guarantee shall cover all defects to the works and shall provide for the replacement or repair of all components that become defective during the guarantee period. Consumable components are excluded from
the guarantee

- The physical sizes of the equipment offered shall be suitable for the locations where current air handling units are installed and shall be positioned in such a manner to ensure reasonable access all around the equipment for maintenance purposes and as may be recommended by the suppliers of the equipment. The Contractor shall, at tender stage, check and ensure that enough space has been allocated for the erection of his equipment and services, taking note of other services sharing the same space. No building modifications will be permitted by NMISA for the removal and installation of equipment, current access to buildings and installation locations must be used without modifications.

- Where any work pierces waterproofing, including waterproof concrete and roofing, the method of installation shall be approved by the Project Manager before the work is carried out. All necessary sleeves, caulking, skirts, soaker sheets, flashing, etc., required to make the openings water-tight shall be provided and installed by the Contractor.

- All materials such as brackets, hangers, etc., shall be shot blasted, pre-painted, galvanized or treated against corrosion prior to their delivery to site. Any work that will require site cutting, etc., i.e. exposure of the bare steel to the atmosphere, shall immediately be treated by cold galvanizing, painting, etc.

- The method of treatment for the above shall depend on the particular environment and type of surface to be coated. The surface preparation, primer coats, finishing coats, etc. shall therefore be in accordance with those specified by reputable paint manufacturers.

13. PRICE AND B-BBEE POINTS

Bidders that met the requirements of the previous stages will be evaluated further in accordance with the 80/20 preferential points system. The 80 points will be allocated for price whilst, 20 points will be allocated for B-BBEE both totalling 100 points. 

The formula below will be used in calculating points scored for the Preference points system.

Step 1: Calculation of points for price

Points awarded for price

The following formula would be applied:

\[ P_s = 80 \left( 1 - \frac{P_t - P_{\min}}{P_{\min}} \right) \]

Where
Ps = Points scored for comparative price of bid or offer under consideration
Pt = Comparative price of bid or offer under consideration
Pmin = Comparative price of lowest acceptable bid or offer.

Step 2: Points allocated for B-BBEE status level of contributor

A maximum of 20 points will be awarded for B-BBEE Status Level 1 of Contributor.
